Developing the Machining World

KIWA Japan

KIWA MACHINERY CO., LTD.

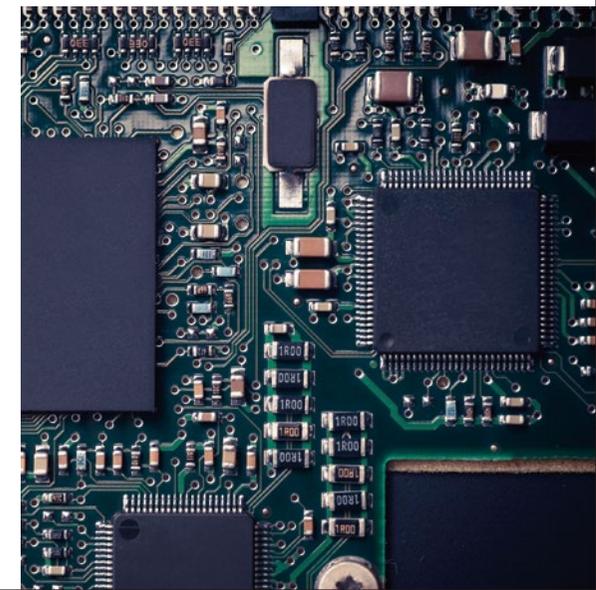

Developing the Machining World

KIWA MACHINERY

Philosophy

Automotive, Medical, Aerospace...

KIWA MACHINERY CO., LTD. is well received by domestic and overseas customers as Japanese machine tool builder. We are aiming at contribution to the good of society by developing and producing Machine Tools, with flexible views and stances corresponding to various needs of the customers.

ENGINEERING

Mechanical designing dept

We realize truly valuable solutions for customers, such as Modification of standard machine, arrangements of Fixture, Robot, and Transfer devices.

We are putting efforts into facilitating "Machine cell", "Automation and incorporation into production line" as a key for labor-saving.

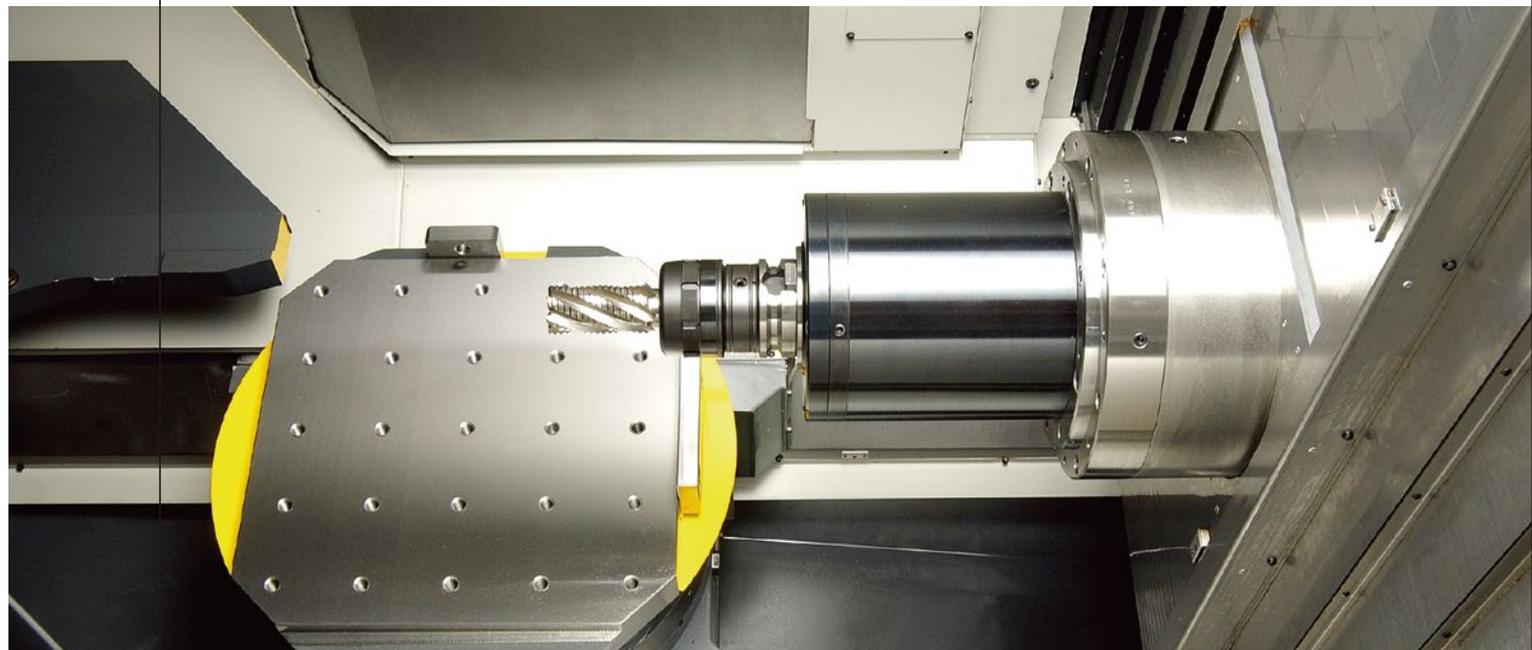

Electrical designing dept

By making full use of leading edge technology, we always pursue a valuable machine control. Through discussions with our customers, we proceed with the specifications completion based on an actual machine operation at the manufacturing site.

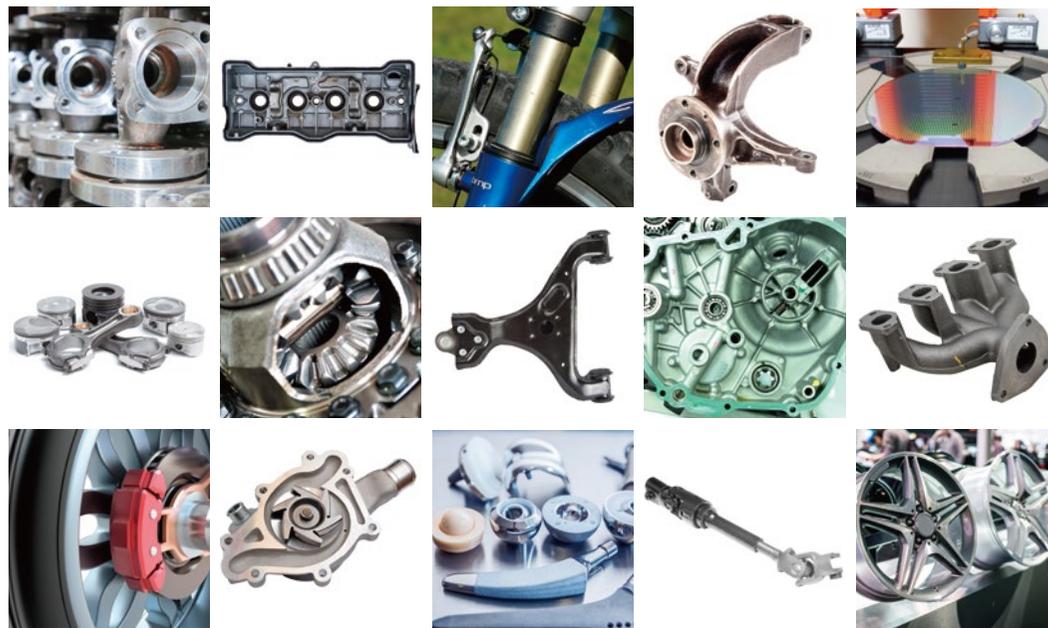

Manufacturing

As a member of Japanese machine tool manufactures who are taking a lead of MONOZUKURI, we are making a point of thoroughly focusing on quality.

From parts procurement to completion of machines, we are proactive in the kind of manufacturing that combines expertise and automation.

Workpieces show KIWA's own strength in proposals

FLEXIBILITY

Sales

It is a conventional expression, but “Customer first” is our principle. Based on experience of struggles for solution with customers, we have specialists on each field. With machining technique, trouble solution, and the latest information about tooling and accessories, we also hope to serve customers in future using our cultivated knowledge and experience.

Production technology

Customer’s factory environment, workpieces, cutting and measurement conditions, cutting coolant types and so on, are well examined to figure out “cycle time”. We’ll also offer fixture plan, workpiece set position that can satisfy our customers. Needless to say, we are aiming to become professionals who can make the best use of our products.

After sales service

Every day, we are doing our best to provide prompt service with our base in Japan. In addition, our network spreads out all over the world.

Overseas business development

HISTORY

1869

Commenced family business to manufacture agricultural machines.

1933

Triple V22

2006

Changed the company name to "KIWA MACHINERY CO., LTD."

2008

Manufactures 5-Axis VMC

KH-4500

2009

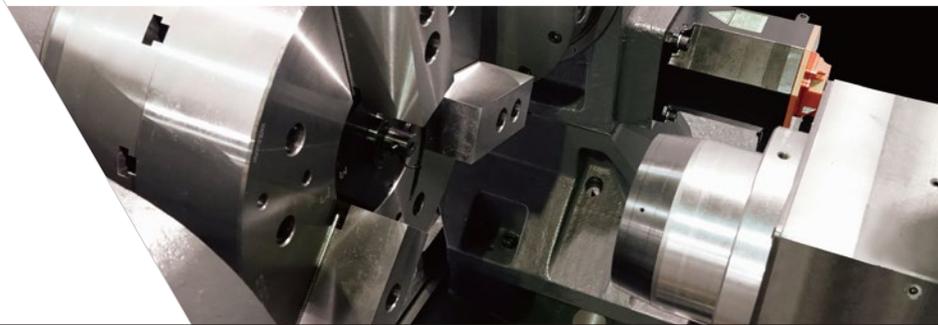

Established "KIWA USA, INC." in MA, USA.

V41-5X

2015

Established "KIWA CNC (THAILAND) CO., LTD." Started after-sales service in Bangkok, THAILAND. Developed Turning table.

Greetings

Developing the Machining World

KIWA MACHINERY CO., LTD. is a machine tool builder in Japan and started to export our products to the USA, Canada, UK, France, Sweden, Germany etc. in 1981.

Customers' requirements for machines are getting more and more sophisticated.

We do our best to quickly and flexibly meet varied requirements from the overseas and domestic markets. Additionally, to expand our organizational capability, we established a joint venture "KIWA-CW" with a Singaporean company. We set up a factory in China since 2005. Also in Thailand as a service office since 2015 to cover Asian markets. As a machine tool builder contributing to society, Kiwa offers machines that can satisfy our customers' requirements.

Managing Director
Nobumasa Kiwa
